

The Hartford's ESG Investment Policy Statement

The Hartford's Statement Regarding Sustainable Investing, Environmental, Social and Governance (ESG) Risks

The Hartford considers environmental, social and governance (ESG) issues to be among the considerations that influence investment return over time. We believe that incorporating ESG attributes into investment analysis provides a more complete assessment of the risks associated with each investment decision.

We expect our investment managers to consider ESG factors such as climate change, natural resources, pollution and waste, human capital, product safety, social opportunity, corporate governance and ethics along with a range of other potential factors in order to assess the expected performance and risk of our investments over time. To ensure all material risk considerations are incorporated into The Hartford's investment strategy, the company regularly reviews investment and portfolio performance, including ESG related holdings, with our investment managers.
