

## CONSTRUCTION RISK ENGINEERING SERVICES

## SAFETY AND HEALTH ARE FIRST AND FOREMOST WITH OUR RISK ENGINEERING.

### HELPING YOUR BUSINESS IMPROVE SAFETY AND REDUCE LOSSES

The construction industry has its share of hazardous equipment and dangerous processes – from operating cranes and blasting rock, to repairing bridges, digging trenches, and erecting scaffolds.

Even under these treacherous conditions, it is possible to perform construction work safely and with a minimum of accidents and injuries. What's needed is an understanding of the risks involved and the knowledge of appropriate, realistic solutions to prevent or control the hazards.

This is just what The Hartford delivers through our highly skilled Risk Engineering consultants and services tailored specifically for the construction industry.

With a focus on our construction customers, your Risk Engineering consultant can provide the dedicated attention you deserve. Since no two contractors are exactly alike, your service plan will be created with your input and custom-designed to fit your business's needs.

### THE HARTFORD IS COMMITTED TO CONSTRUCTION

The Hartford's been writing contractors of all sizes for decades – so we understand your industry and are committed to it. As your business insurance provider, we share your desire to control costs. The Hartford is committed to helping your business improve safety and reduce losses. That's why we are staffed with construction experts across the country who provide consultative service to businesses like yours.

### EXPERIENCE, EXPERTISE AND FOCUS

Many of our Risk Engineering consultants have worked on construction sites as safety directors and in other capacities. This practical experience, combined with a dedicated focus on construction and extensive training – including OSHA 10 and 30 – makes our Risk Engineering consultants uniquely qualified to advise you about safety and injury prevention.

**Prepare. Protect. Prevail.®**

### SERVICE PLANS TAILORED TO YOUR NEEDS

As an outside observer, your Risk Engineering consultant brings a fresh perspective to your construction project. With a focus on our construction customers, your Risk Engineering consultant can provide the dedicated attention you deserve. Your service plan will be created with your input and custom-designed to fit your business's needs. We start by asking you what safety risks are most critical to your operations, and then develop a plan to improve safety for those risks.

Here are some of The Hartford's Risk Engineering services that can benefit your business:

- **Pre-construction surveys** – Prior to construction, your Risk Engineering consultant can review your project from a broad perspective and identify problems that may develop inside and outside the scope of your construction project.
- **Job site surveys** – At your existing job sites, your Risk Engineering consultant can identify hazardous conditions and offer cost-effective, practical solutions to correct them.
- **Safety manual** – If you don't have a safety manual or want your manual updated, your Risk Engineering consultant will be happy to assist you.
- **Loss analysis** – We can analyze your losses, identify what's causing them, and recommend ways to reduce accidents and lower your losses.
- **Industrial hygiene lab, AIHA-accredited\*** – Our industrial hygiene experts will consult with you to assess your operations and help you identify, quantify, understand and control hazardous conditions, such as excessive noise and airborne contaminants.
- **Comprehensive training** – The Hartford offers a wealth of safety training for the construction industry – from safe excavation to fall protection and scaffold safety. (We also can provide PowerPoint presentations of our training programs for your convenience.)
- **Free OSHA 10 and 30-hour training** – All of our construction Risk Engineering consultants are authorized as OSHA 10 and 30 trainers and can instruct your workers. This valuable training is free of charge to insureds of The Hartford, and agents receive CEU credits.
- **Free supervisory leadership and safety management workshop** – Our workshop provides supervisors with the necessary skills to involve and motivate construction employees, plan for complex construction operations, and recognize the financial impact that the safety and health program plays in the overall success of your company. This valuable training is free of charge to insureds of The Hartford, and agents receive CEU credits.
- **Speakers for safety meetings** – Our highly skilled Risk Engineering experts are happy to speak at your safety committee meetings on a variety of loss prevention topics that either you or we suggest. The topics can be geared to your employees, supervisors, subcontractors, or other individuals.
- **Library of resource materials** – The Hartford offers insureds a vast library of materials including best practice bulletins, technical information papers (TIPS), inspection checklists, training presentations, sample safety and health programs and written program guides.
